Leveraging 85 Years of Structural Expertise to
Educate the Next Generation of Utility Personnel

JOINT USE SEMINAR

Join fellow professionals for two days of instruction to learn about pole loading, FCC updates, one-touch make ready, and best practices for joint use.

June 19-21, 2023 | Peachtree City, GA

Course Outline

- Recent Updates to FCC Governing Attachments and What it Means for Pole Owners
- Best Practices for Managing and Updating Joint Use License Agreements
- Identifying and Cost-Effectively Correcting Past Issues
- Establish an Accurate Attachment Baseline to Support Billing, Permitting, and Future Audits
- Benefits of Leveraging Attachment Audits to Support Additional Initiatives
- Maximizing Cost-Recovery
- Funding, Challenges, Reducing Impact, and Benefits of Rural Broadband
- Impacts of 5G/Small Cell Attachment Requests
- Fiber and Wireless Make-Ready Design Considerations
- Optimizing Post-Construction
- Understanding and Implementing Pole Loading Analysis to Manage Risk
- Technologies, Visualization, and Process Improvements to Support Increases in Permitting Activity
- Field Technology Demonstrations
