Leveraging 85 Years of Structural Expertise to Educate the Next Generation of Utility Personnel

# STEEL TECHNICAL SEMINAR

Join fellow utility asset management and engineering professionals as industry subject matter experts provide two full days of instruction, including an overview of Structural resiliency as a Service®, program development, use of analytics and best practices for steel structure assessment, corrosion mitigation, and structural restoration of steel towers and poles and concrete foundations.

**May 13-15, 2024 | Peachtree City, GA**

## Course Outline

- Using Analytics in Structure Asset Management
- Total Structure Assessment
- Engineering Analysis of Steel Structures
- Structural Resiliency
- Corrosion Prevention
- Asset Restorations
- Cost Analysis: Steel Asset Retention (Stewardship) vs. Loss/Replacement
- Program Capitalization
- Live Outdoor Demonstrations
- Substation Reliability and Resiliency

## Complimentary for Osmose customers

Includes:

- 10 hours of instruction eligible for PDH credit
- Welcome dinner reception
- Off-site social event
- Breakfast and lunch during seminar
- Transportation from the host hotel to the Osmose campus

## Who Should Attend?

- Asset Managers
- Utility T&D Engineers
- Program Managers
- Anyone responsible for lifecycle management of steel transmission, distribution, and substation assets

**LIMITED SPACE AVAILABLE**

Register online at [osmose.com/steeledu](https://osmose.com/steeledu)

Attendance is limited to asset owners with focus on first-time attendees.
