# Osmose® 360™

Joint Use Apply

Osmose 360™ for Joint Use Apply (O360 Apply) is designed to provide pole owners a common platform for attachers to submit and track applications for attachment. Combined with easy to read status dashboards and reports, O360 Apply ensures all stakeholders are fully connected throughout the attachment process, eliminating confusion about status and allowing for easy monitoring of performance and deadlines.

Features and Functionality

✓ Track all milestones related to the project workflow for each attachment request, starting when the application is submitted to Osmose all the way to the application approval

✓ Detailed tracking and archiving of supporting documentation associated with each application, including data, images, designs, and documents

✓ Online environment for communication and collaboration between Osmose and pole owners

✓ Easily and effectively communicate status changes, action items, incident management, and reporting

✓ Track details of an application including application status, timelines, completion dates, action items, and status of individual poles

✓ Prioritize issues through automated and user-triggered emails to project stakeholders

✓ Visual, executive dashboard for illustrating project performance, summary reports, and project details

✓ Create new applications for submission - O360 Apply supports all types of applications including wired, wireless, equipment, overlash notifications and other attachment types

✓ View each pole on a map to see a simple, high-level view of the make-ready work required to accommodate the attachment and the street view of each pole
