

Customer Portal

Osmose is excited to provide an interactive customer portal, Osmose 360®. Designed to provide utility structure owners a centralized, and interactive common platform, the portal ensures all stakeholders stay connected on project phases with easy-to-read status dashboards, reports, and analytics.

Project Dashboard

Utility structure owners and program stakeholders will have an at-a-glance view of key performance indicators, including project performance, completion, and financials, on a customizable dashboard.

Map View

Built on ESRI ArcGIS, the Map View shows structure details and history using geospatial maps with layering options.

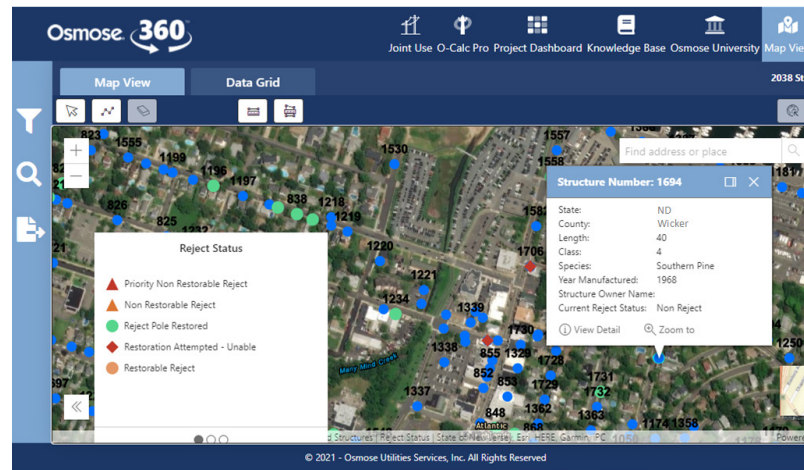

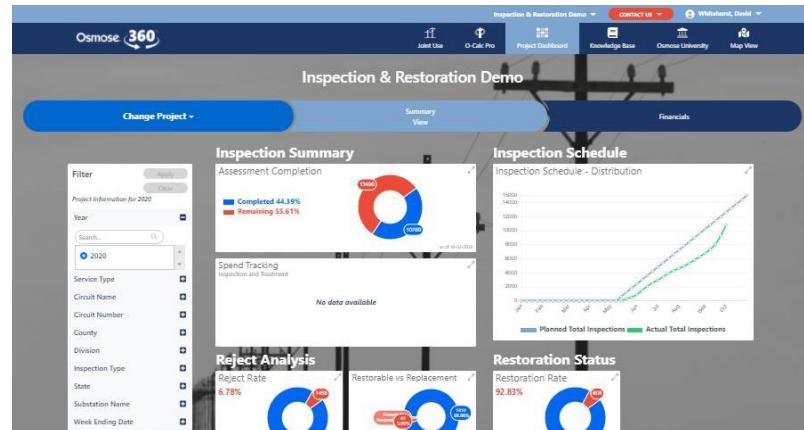

Knowledge Base

Knowledge Base gives users the ability to search for industry standards and knowledge, educational information, and best practices.

Joint Use

The Joint Use dashboard provides poles owners, attachers, and stakeholders a common platform to be fully connected to the pole attachment process.

To contact your local Osmose professional, call 770.631.6995 or email poleinfo@osmose.com.
