

Rural Broadband: Joint Use Readiness Check

Get ahead of the broadband demand surge!

As the demand for broadband continues to rise, pole owners must be prepared to manage a higher volume of pole attachment requests – quickly, efficiently, and cost-effectively.

Leveraging decades of Osmose's joint use expertise, the **Joint Use Readiness Check** is a smart, streamlined service that evaluates your current pole attachment permitting workflows and agreements. This proactive assessment will help you **identify inefficiencies**, **reduce bottlenecks**, position you to **maximize cost recovery**, **improve operational readiness**, and **prepare you for scalable growth**.

Readiness Action Plan

1. Comprehensive analysis of any active joint use/pole attachment agreements and operations.
2. Program setup to support make-ready assessments for third-party attachment requests.
3. Develop standard unit pricing that match existing agreements for Osmose permit support if supplementary resources are needed.
