Leveraging 90 Years of Structural Expertise to  
Educate the Next Generation of Utility Personnel

# UNDERGROUND TECHNICAL SEMINAR

Join fellow utility asset management and engineering professionals as industry subject-matter experts provide a full day of instruction on the topic of managing the life cycle of underground power systems.

**November 10 - 11, 2025 | Peachtree City, GA**

## Course Outline

- Significant failure mechanisms
- Best Practice Techniques to Proactively Identify Deficiencies
- Capitalized Remediation Methods for Major Underground Assets Such as Cables, Vaults, and Transformers

Leaving this seminar, you will be empowered to confidently specify materials, methods, and services to solve your underground safety, reliability, and resiliency challenges.

## Complimentary for Osmose customers

Includes:

- 8 hours of instruction eligible for PDH credit
- Welcome dinner reception
- Off-site social event
- Breakfast and lunch during seminar
- Transportation from the host hotel to the off-site event

## Who Should Attend?

- Asset and Risk Managers
- Utility T&D Engineers
- Program Managers
- Anyone responsible for the lifecycle management of underground power systems

**LIMITED SPACE AVAILABLE**

Register online at [osmose.com/osmose-seminar-underground](https://osmose.com/osmose-seminar-underground)

Attendance is limited to asset owners and first-time attendees
